

MOBILE CRUCIBLE FURNACES

Typ. MVTP - EM

DESCRIPTION:

Electrically heated bale out furnace suitable for melting and holding of non-ferrous-metals.

ADVANTAGES OF CRUCIBLE FURNACES:

- quiet operation
- minimal heat loss
- no need for suction
- high accuracy of temperature regulation

LONCE:

V peči se vgrajujejo grafitni ali SiC lonci.

FURNACE SIZES:

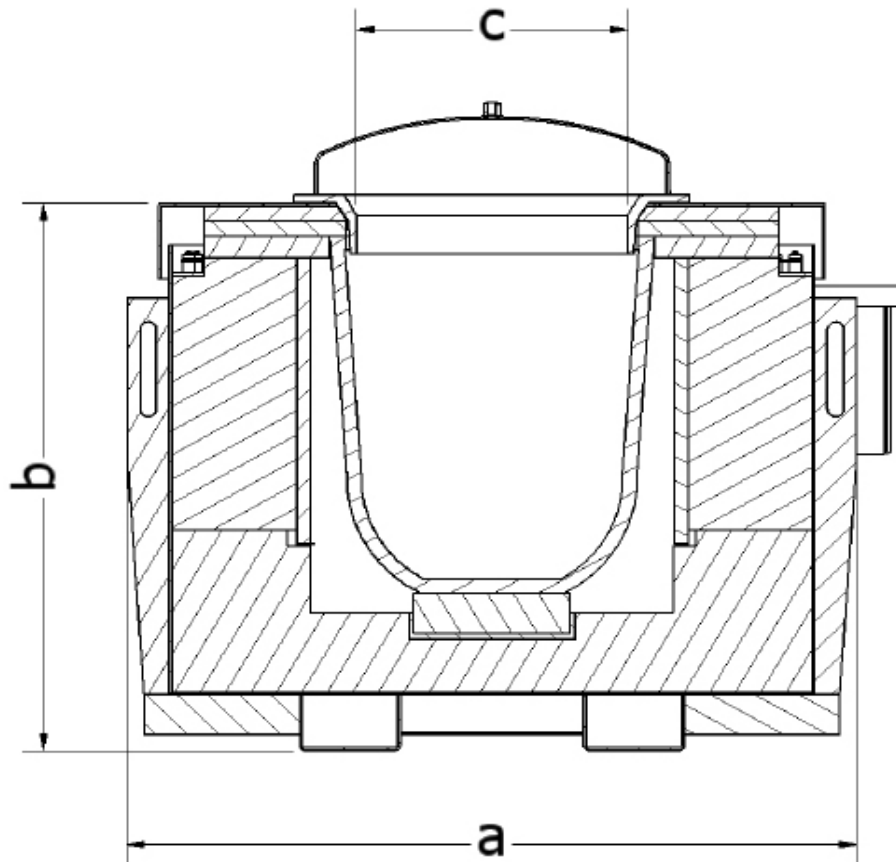

250 - 1100 kg of Aluminium
(other sizes can be made on request)

TEMPERATURE CONTROL:

Through a thermocouple in the wall of the crucible and in the heating chamber, each with electronic temperature regulators. Regulation is possible from the heating chamber only. Automatic switching-on by timer with weekend switching-off device. The energy consumption is checked through an amperemeter.

TECHNICAL DATA:

Size	Crucible size	Quantity of Al. kg	Power supply		Dimensions (mm)
